Class Y USD Shares
ISIN: IE00BMXR2498

Management Company: Sector Fund Services AS

Objective and Investment Policy

Investment Objective: The investment objective of Sector Healthcare Value Fund (the "Fund") is to achieve attractive long-term investment returns relative to the MSCI Daily TR World Net Health Care USD (the "Index"). The Fund is actively managed, which means that the Investment Manager is actively making investment decisions for the Fund.

Index: The Fund's returns will be compared to the MSCI Daily TR World Net Health Care USD. The Index is a capitalisation weighted index that monitors the performance of health care stocks from around the world. The Fund may invest in equities and financial instruments that are not part of the Index.

Investment Strategy: The Investment Manager intends to pursue the Fund's investment objective by implementing a long only strategy consisting of investment in equity and equity related securities issued by companies in the global healthcare sector. The global healthcare sector includes, but is not limited to, companies involved in pharmaceuticals, biotechnology, medical technology and health care services.

The basic thesis of the Investment Manager is to buy equities that in their opinion are undervalued by the respective market. The Investment Manager will seek to identify and exploit such mis-pricings through fundamental analysis.

The Fund may invest up to 10% of its assets in other collective investment schemes; including exchange traded

funds which themselves invest in the global healthcare sector. The Fund may also invest in equity based derivative contracts such as swaps, forwards, contracts for differences, convertibles and rights.

Base currency: USD

The Fund is a multi-class fund with share classes also available in EUR, GBP, NOK and SEK. For Class Y shares, non-base currency share classes are not currency hedged against USD.

Buying and selling: Shares may be subscribed, redeemed and transferred in the Fund on a daily basis, except on weekends or bank holidays in Norway, Ireland or USA. The Fund is available for subscriptions in EUR, GBP, NOK, SEK and USD.

Dividends: All dividends will be reinvested by the Fund and accumulated in the net asset value per share of the Fund. No dividend distribution will be paid.

Investment Horizon: Investments in the Fund may be suitable for investors with a long-term investment horizon.

The capital in the Fund is not protected, and future returns are not guaranteed. For full investment objectives, policy details and dealing terms, please refer to the Company's Prospectus and the Fund's Supplement.

Risk and Reward Profile

The above risk category is based on historic data and is no guarantee of the future risk level. The risk and reward category is not guaranteed and is likely to shift over time. Please note that the lowest category does not mean a risk-free investment.

The Fund is a long only fund and primarily invests in the healthcare sector. This combination typically gives the Fund a higher risk categorisation.

- **Liquidity Risk** - Certain securities may become difficult to value or sell at wanted price and time.
- **Concentration Risk** – As the Fund is invested in the healthcare sector, the Fund may face losses in case of unwanted events affecting that sector.
