2025

Incentive AS

Generated 24-11-2025

About this report

PRI reporting is the largest global reporting project on responsible investment.

It was developed with investors, for investors. PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders. This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2025 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Disclaimers

Legal Context

PRI recognises that the laws and regulations to which signatories are subject differ by jurisdiction. We do not seek or require any signatory to take an action that is not in compliance with applicable laws. All signatory responses should therefore be understood to be subject to and informed by the legal and regulatory context in which the signatory operates.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2025 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

Sustainability is essential to our investment and portfolio management process because we believe that companies who behave responsibly, with greater focus on sustainability, will create greater value than their peers, as their sustainability efforts should lead to relatively higher growth, more efficient operational performance, lower business risk, lower cost of capital and greater protection of investors' interest. That is why we have integrated sustainability analysis into our bottom-up research process and why we work actively with our portfolio companies to promote good corporate governance on sustainability issues. Incentive defines a "sustainable company" as a company whose products or services meet a real and substantive demand over the long term. A sustainable company also identifies and manages its sustainability risks and impact on the environment, society, and people in line with the expectations of society. We will seek appropriate disclosures on sustainability issues from the companies we invest in, both pre acquisition and throughout our ownership period. When we assess potential investments, we will consider issues including environmental and climate impact, labour and human rights issues and ethics and governance issues as part of the due diligence process. When we invest in companies with real but manageable sustainability risks, we will engage actively with the company to mitigate the risks and improve its sustainability performance. Our main commitment, and the purpose of our sustainability framework, is to identify and promote good corporate governance on sustainability issues. In the investment process, we consider how companies reflect upon and manage these risks and opportunities as well as their sustainability performance measurement and reporting, governing documents, and strategies.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

During 2024, we held specific meetings with all portfolio companies to discuss their approach to ESG and their major initiatives to improve ESG performance. Environmental performance was a key focus area for us during the year and for those companies that were not already committed to the Science Based Targets Initiative for reduction of greenhouse gas emissions, we pushed actively for these companies to commit to these targets. Several of our portfolio companies became signatories to SBTi during the year, in part due to our involvement as active owners.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

We will continue to conduct annual sustainability reviews with our portfolio companies and continue to push companies that have not yet committed to SBTI to do so.

Section 4. Endorsement

We practice active ownership by way of regular reviews, with a particular focus on the state of governance in each portfolio company. We maintain regular contact with the board of directors and top management, and we challenge them when progress on sustainability targets is slow or when emerging situations call for risk mitigation and/or improved governance. The team assesses how the sustainability governance of the company helps mitigate the inherent sustainability risks. The team expects to see ESG responsibility high up in the organization and high up on the agenda (board and management need to have real engagement on the topic).
